

Why lease?

Quick results

Leasing allows you to have the latest equipment working for your business quickly and easily with a fast approval, minimal documentation and prompt equipment delivery.

Low payments

Effectively maintain cash flow with lease payments that are often lower than loan financing.

Flexibility

Structure payments and terms to fit your cash flow. Varying end of lease options give you the choice to purchase the equipment, return it, or extend your agreement.

100% financing

Conserve lines of credit and acquire equipment without a major cash outlay. Unlike loans, which may require up to 20% down, leasing generally has minimal up-front costs. Finance up to 100% of the equipment cost, with additional options possible to cover soft costs like installation and training.

Tax and accounting benefits

When used together, Section 179 and bonus depreciation may allow businesses to deduct up to 100% of capital purchases.
