Keeler USA & Olleyes Partnership

Malvern, Pennsylvania (September 14, 2020), Keeler a world leader in ophthalmic diagnostic, digital, surgical, and clinical products is proud to announce our US partnership with Olleyes of Summit, NJ. Olleyes is a medical device company developing office and home-based diagnostic products to improve productivity in eye care with a personal touch by their product, VisuALL (Virtual Reality Perimetry) VRP.

The VisuALL is a platform designed for standardized and mobile assessment of the visual fields and visual acuity. VisuALL automatically analyzes the retinal sensitivity in patients with Glaucoma and other visual disorders. VisuALL enables the examination of multiple patients at a time increasing office productivity.

The VisuALL most used protocols like 10-2, 24-2, 30-2 along with pediatric testing; and keeps the patient's physical needs forefront in the design of the product. The mobility of the product allows providers to adhere to current health and safety protocols while increasing productivity.

End.
